

"To us, Songwa means both commitment and passion."

"Teamwork makes the dream work."

THINKING INTERNATIONALLY – OPERATING REGIONALLY

The goal for us – La Marzocco, Mahlkönig and Probat – right from the start was to put the focus on the local people and influence their personal living conditions in a positive way. Our support of the nearby Muvwa Primary School started in 2012 and is one example of this. At the end of 2015, we added another building with two classrooms to the school. This ensures a place for learning for approximately 330 children.

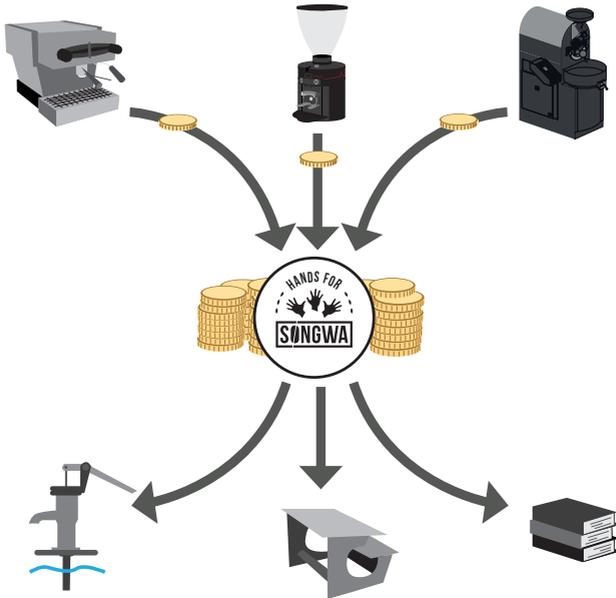

This year, the funds raised will be invested into the construction of four fresh water wells with cement platforms and pumps.

ACCOMPLISHING MORE – WITH HANDS FOR SONGWA

In addition to the school project, in the future we will support other projects in the region. Together, we wish to improve the quality of life of the people in the Rift Valley. For this reason, we will increase our previous commitment by donating a fixed amount for every machine that is sold.

THIS IS HOW IT WORKS:

"While we learn about coffee we connect with the people growing it."

WHY SONGWA?

Coffee production requires a great deal of effort along the entire process chain. This starts long before the preparation with the cultivation of the coffee. We have been leasing SONGWA ESTATES plantation in the Rift Valley in southwest Tanzania since 2007 in order to continually raise awareness of this demanding process.
